Jasson Walker of cFocus Software Incorporated Teams with OPTIMUS Corp. on Software Project for EDS

Largo, MD – (BUSINESS WIRE) – cFocus Software Incorporated, a federal software consulting and project management services provider, announced today that its founder, Jasson Walker Jr. has teamed with OPTIMUS Corporation (www.optimuscorp.com) to produce custom software for the benefit of EDS (www.eds.com).

OPTIMUS Corporation enhances public safety and quality of life through innovative, customer driven solutions. OPTIMUS products and services increase efficiency, reduce transaction costs and help minimize risk – enabling governments and organizations to significantly improve service delivery. Since 1992, OPTIMUS has worked to strengthen our nation's vital infrastructures with award winning products and services in mission critical environments for many federal, state and local government agencies. OPTIMUS delivers proven results through lasting technology partnerships founded on uncompromising integrity. Its relentless commitment to quality has earned OPTIMUS customer praise and prestigious industry recognition, including the 2003 National Capital Business Ethics Award.

Jasson Walker Jr. has been tasked to provide principle leadership in software architecture, design and implementation for the Joint Personnel Adjudication System (JPAS) data engine tool. This tool will feature an XML based configuration that will allow personnel data from various DoD agencies to efficiently and automatically submit data into the JPAS database. The software team that Jasson Walker Jr. will lead includes several employees of the Research and Development division of OPTIMUS Corporation.
