cFocus Software Incorporated Selected by ASD, Inc. to Re-Engineer Corporate Portal

Largo, MD – (BUSINESS WIRE) – cFocus Software Incorporated, a federal software consulting and project management services provider, announced today that the company has been selected by ASD, Inc. (www.asd-inc.com) to Re-Engineer ASD's corporate portal.

ASD is an enterprise information technology (IT) solutions provider with more than 26 years of experience and an annual revenue base in excess of \$20 million. ASD provides IT services from offices located in Huntsville, Alabama; Arlington, Virginia and at numerous client sites located across seven states and the District of Columbia.

cFocus Software Incorporated has been tasked to re-engineer the portal for both internal and external portal users. Internal portal users include the human resources division, accounting, and the various project managers on many of ASD's contracts. Additionally, cFocus Software will make the portal more useful and accessible to ASD's clients, including The United States Army Space and Missile Defense Command/U.S. Army Forces Strategic Command (USASDMC/ARSTRAT), who will utilize ASD's portal to keep track of the various resources associated with their contract with ASD. The contract has an estimated face value of nearly \$5 million for its base year. There could also be potential award term periods and options added for a contract maximum of \$404,999,259 spread throughout 10 years.
